About Me

I am a backend-focused Software Engineer with hands-on experience in developing scalable web applications using PHP (Laravel), Docker, and MySQL. Currently working at Barikoi Technologies Ltd., I specialize in back-end architecture, RESTful API design, and system optimization. I follow clean code practices, TDD, and Agile methodologies. While I focus primarily on Laravel, I am also exploring Symfony and DevOps tools like CI/CD and Docker. Passionate about security, testing, and solving real-world problems through efficient code.

Experience

Barikoi Technologies Limited | *Software Engineer Backend*   Feb. 2025 – Present
Technologies: Laravel, MySQL, Docker, Nginx

- Designed scalable Laravel applications with a focus on clean architecture, job queues, and performance tuning.
- Participated in Agile sprints and daily stand-ups using Scrum methodology.
- Contributed to peer code reviews and improved legacy modules for maintainability.
- Used Docker for development and deployment in Linux environments.
- Participated in the deployment and monitoring of Laravel-based API services.

Phone Tech BD Ltd | *Junior Backend Developer*   Jan. 2024 – Jan. 2025
Technologies: Laravel, Livewire, MySQL

- Developed RESTful APIs for mobile applications and internal tools.
- Integrated Livewire for dynamic UI components and streamlined back-end logic.
- Optimized database queries and back-end performance.
- Implemented role-based access and authentication systems.

Projects

Verify API Platform | *Laravel, Docker, MySQL*
- Working on a legacy Laravel codebase to implement new features, refactor existing logic, and optimize performance.
- Followed secure coding practices with middleware and validation.
- Participated in deployment and monitoring of the application using Docker and Nginx.

Shifttrek | *Laravel, Livewire, TailwindCSS, AlpineJS, MySQL*
- Employee Management System featuring role-based access, attendance, payroll, and reporting.
- Includes API integration for apps, access control, leave management, and automated salary calculation.

Skills

Languages: PHP, JavaScript, Python, HTML/CSS, C **Database**: MySQL, Redis (basic)

Libraries and Frameworks: Laravel, Livewire, TailwindCSS, React, Symfony (basic)

Tools: Git, GitHub, Postman, Docker, Nginx, GitHub Actions (CI/CD)

Practices: Agile/Scrum, TDD, Code Review, API Security, Deployment

Problem Solving: Hackerrank, Leetcode **Operating Systems**: Windows, Linux

Education

Khulna University   Jan, 2018 - Mar, 2024
B.Sc. in Computer Science and Engineering

Core Courses: Object-Oriented Programming, Data Structures, Algorithms, Software Engineering, Computer Security, Computer Networks, Artificial Intelligence, Data Mining and Machine Learning.
